EDUCATION

UFMG – Universidade Federal de Minas Gerais — Belo Horizonte, MG **Information Systems • 04/2025**

SUMMARY

Fullstack developer experienced in building end-to-end web products: Laravel and Node.js/NestJS APIs, Next.js/React interfaces with TypeScript, and CI/CD pipelines for reliable production deployments.

EXPERIENCE

Private Code Soluções Digitais
Remote

Back-end Developer
10/2025 – 09/2026

- Maintained a barbershop-management SaaS in Laravel and Blade, using MySQL for persistence and Redis for caching and queues.
- Fixed client-reported bugs and shipped improvements to scheduling, payments, and customer-management features.
- Provided ongoing support for the platform's evolution in production.

Oak Tecnologia
Remote

Fullstack Developer
09/2022 – 05/2025

- Built the Ticketing Platform (event ticket sales and issuance), with a Laravel (PHP 8.1) API responsible for ticket PDF generation, and a Next.js frontend.
- Built XBRI's admin backoffice with a NestJS/TypeORM backend (JWT authentication, Swagger API docs, AWS S3 file storage, RabbitMQ queues) and a Next.js frontend.
- Developed and maintained the Next.js admin panel for a project-management system, consuming Laravel REST APIs.
- Created reusable UI components with TypeScript and Tailwind CSS, standardizing frontend development across projects.
- Implemented CI/CD pipelines with GitHub Actions and Docker, significantly reducing deployment time.
- Wrote unit and integration tests (Jest and PHPUnit) and conducted code reviews to maintain quality.
- Optimized SQL/NoSQL queries and modeled PostgreSQL/MySQL databases, improving API response times.
- Mentored junior developers and led the migration of legacy systems to modern stacks.
- Ensured application security with JWT authentication, Zod-based input validation, and API design best practices.

Sunset Tires
Remote

Fullstack Developer
06/2022 – 09/2022

- Developed a complete back-office system (products, orders, customers, and inventory) for a tire company.
- Built scalable RESTful APIs with NestJS for business rules, authentication, and data operations.
- Designed interfaces with React and TypeScript, optimizing usability for internal teams.
- Modeled and maintained a PostgreSQL database with entities for catalog, orders, users, and stock control.
- Implemented JWT authentication and role-based access control (RBAC).
- Deployed the application with Docker and Docker Compose, managing development and production environments.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS, Ant Design, HTML, CSS

Backend: Laravel, PHP, Node.js, NestJS, TypeORM, RESTful APIs, PostgreSQL, MySQL, Prisma, Zod

DevOps: Docker, Docker Compose, Git, GitHub Actions, CI/CD, AWS S3, RabbitMQ

Testing: Jest, Testing Library, PHPUnit

Languages: Portuguese (native), English (advanced)

Interests: Artificial intelligence applied to programming, open-source development and technology communities.
